OBJECTIVE

A Web Developer with a strong foundation in HTML, CSS, JavaScript, React.js and Node.js. Eager to bring creativity and dedication to a dynamic team, contributing to innovative web solutions and expanding skill sets in a collaborative work environment.

SKILLS

- **Languages:** Core Java, HTML, JavaScript
- **Frameworks:** Tailwind CSS, React.js, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Others:** Git, GitHub, Postman

PROJECTS

Admin Dashboard (<https://react-admin-dashboard-zeta-jet.vercel.app>)

- Developed a dynamic admin panel using **ReactJS** and **Material UI**.
- **Implemented user management** with features like viewing, editing, and deleting users.
- **Integrated Data Grid** for sorting, filtering, and handling large datasets efficiently
- **Customizable columns and editable rows** for flexible data interaction.

E-commerce Website (<https://e-commerce-phi-flax-62.vercel.app/>)

- Designed a feature-rich e-commerce platform using **React.js** and **Tailwind CSS**, showcasing proficiency in modern front-end technologies.
- Utilized React's component-based architecture to create modular and reusable UI components, resulting in a scalable and maintainable codebase.
- **Integrated external APIs** for essential e-commerce functionalities.

Backend Project (<https://github.com/Mukeshzz/backend>)

- **Developed RESTful APIs** using Node.js and Express to handle CRUD operations.
- **Implemented authentication and authorization** with JWT for secure user access control.
- **Integrated database management** with MongoDB for efficient data storage and retrieval.
